

## Applications

- Microscopic gold-plated contact springs, gate valve actuation compression springs, Belleville washers, seal springs and gaskets. You name it, we cover all aspects of spring and presswork for the valve and actuation industry
- Aggressive and demanding safety critical environments
- Our products are in use in outer space, the deepest oceans and everywhere in between
- Batch sizes range from one to millions

## Quality

- ISO9001
- AS9100
- NADCAP
- ERP controlled manufacturing processes
- Industry-leading delivery performance and quality

## Presswork & Assemblies

- Vast range of equipment and blanking capacity up to 125 tons
- Same wide range of ferrous, non-ferrous and synthetic materials as our springs
- All of our tooling is manufactured and maintained in-house via our extensive tool room including EDM and CNC machining to give you excellent quality and repeatability
- In-house vibro peening, chemical etching and inkjet marking

## Springs & Wireforms

- Virtually every spring type
- Wire range from 0.1 to 20mm
- Beryllium Copper, Inconel, Titanium, Stainless Steel, Phosphor Bronze, Hastalloy, Inconel, Nimonic etc
- Hand-crafted & CNC Auto manufacture
- Almost 1,00 years of collective experience and state-of-the-art spring design CAD software at your disposal

## Confidence

With such a rich resource of experienced people, MSP has the capability and proven track record to assist you with an engineered solution from prototype to fully developed product, all backed with proven industry-leading delivery performance and consistent high quality.
